# ADA SEMANTIC PUBLISHING PIPELINE

# CONNECTING COMPUTATIONAL PUBLISHING FOR COLLECTIONS #CP4C – USING QUARTO

# DEMO & RUNNING QUARTO

→ Open Notebook — xSketchbook: Computational Publishing

→ Computational Publishing for Archives (Quarto) — GH Page Demo

You can fork the repo here, and there are instructions on the repo to install and make a book, as well as a for a Docker container.

# GOALS FOR WORK PACKAGE

Evaluate and select a platform

Test digital objects (LOD sources and media), and queries

Product PoC publication demo

Workshop with NFDI4C collection scholars

COPIM conference workshop Feb 23
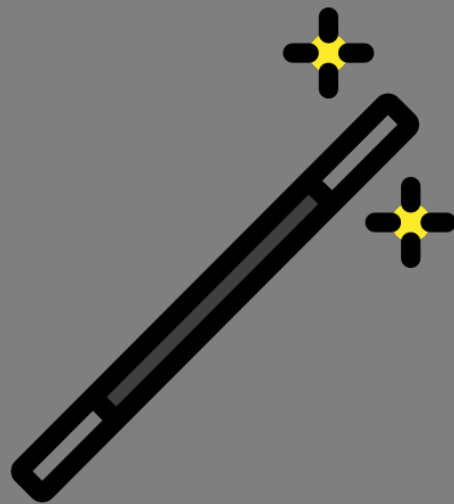

Make plan for ADA integration

# OUR QUESTIONS?

Do we satisfy publishers needs?
How to make it relevant for collection scholars?
How to develop this into a
‚publishing from the collection‘ tool?

# DEMO TIME!
